

NMi: Your Partner in EU Battery Regulation Compliance

One single point of contact for full EU Battery Regulation (EUBR) compliance: from planning your compliance roadmap to pre-compliance audits and final certification. NMi guides you through every step, ensuring you meet the new legislation on time

Why act now?

- Legal obligations are already in effect, and full compliance is expected by 2027 — giving one year to prepare, start the process with a NoBo and get certified
- Avoid delays from scarce testing capacity and Notified Body bottlenecks
- Stay ahead of shifting deadlines and incomplete guidelines
- Safeguard the safety and performance of your battery products
- Start ahead to minimize risks of non-conformities by contacting NoBo in advance

For whom?

-  Battery packs manufacturers ✓
-  OEMs and system integrators
-  E-mobility solution developers
-  Energy storage companies (ESS)
-  Importers & distributors within the EU

Why Choose NMi

- ✓ Independent, accredited partner with a long history in certification
- ✓ Expertise in EU Battery Regulation 2023/1542 and conformity modules (e.g. D1, ISO 17065 accreditation for MOD D1)
- ✓ Market insight: guidance on due diligence, carbon footprint & recycled content as well as expert training
- ✓ Access to test services (UN38.3, IEC 62619, IEC 62133, IEC 62660, IEC 61960)

Steps to EUBR Compliance

1. Request & Intake – Discuss your product and compliance scope with an NMi expert
2. EUBR Compliance Roadmap – get training and plan ahead to ensure you meet the regulation deadlines
3. Pre-compliance audit – Check where you are at with document review, process verification and compliance
4. Certification & Market Access – make sure you have covered all steps and are ready for the final certification
