

Are your Water Meters ready for the revised standard?

As regulations evolve, staying compliant isn't optional. NMI offers the expertise and efficiency to certify your water meters under the new OIML R49 (2024) requirements. From type approval to guidance with our webinars and training courses

OIML R49 Revisions:

- Updated Test Methods – Verification and conformity testing now follow more rigorous procedures
- Digital Compliance – Emphasis on software integrity, remote monitoring, and secure data handling
- Expanded technical requirements - new requirements for electronic water meters are introduced

What does this mean for you?

Existing meters may require re-evaluation under the new performance and conformity testing guidelines

Software and data handling systems must align with updated digital compliance expectations

Non-compliance could lead to certification delays, limited market access, or legal risk

Why Choose NMI

- ✓ Unmatched Experience – Over 150 years of legal metrology expertise, including water and utility metering
- ✓ Efficient Certification – Streamlined test programs, minimizing time and cost while ensuring full compliance
- ✓ Independent & Trusted – The only privately owned certification body with deep regulatory knowledge across Europe
- ✓ Complete package – We offer guidance, documentation sup-

Learn More About OIML R49 – Watch Our On-Demand Webinar

Get a clear overview of the latest updates to OIML R49 / ISO 4064 and what they mean for water meter design, testing, and certification. Our Senior Expert Arne Prins breaks down the key changes, their impact on existing approvals, and how manufacturers can stay compliant. Watch our on-demand webinar for more insights on the 2024 OIML R49 revision.
