

Introduction

NMI Certin B.V. is a lab specialized in the testing of measuring equipment, usually used for custody transfer/weights and measures. In the Annex to declaration of accreditation (scope of accreditation) registration number: L029, tests are described which are accredited by the Dutch Accreditation Body – Raad van Accreditatie (RvA).

The relation between a specific test and the standards for which the test can be performed, is given below. Herewith the standards are presented for which NMI Certin B.V. can refer to accreditation. In this list provides information if NMI Certin B.V. is able to perform the tests on their test object, in accordance with a specified standard, referring to accreditation.

If different test objects or standards are requested, NMI Certin B.V. reviews the applicable requirements and identifies whether they have the capability to perform the required test. When the internal verification shows that NMI Certin B.V. is capable of performing the test for a specific test object or standard, the list below is updated accordingly.

Overview of validated documents

The standards according to which these products can be tested in NMI Certin B.V. are:

No.	Test object	Standard	Test activity reference number and description
a	Measuring instruments and ancillary equipment	WELMEC Guide 7.2: 2021 Software Guide	PT37 - Software validation
b	Measuring instruments and ancillary equipment	WELMEC Guide 7.2: 2022 Software Guide	PT37 - Software validation
c	Measuring instruments and ancillary equipment	WELMEC Guide 7.2: 2023 Software Guide	PT37 - Software validation
d	Measuring instruments and ancillary equipment	WELMEC Guide 7.2: 2025 Software Guide	PT37 - Software validation
e	Automatic Distance Time speed meters	Automatic Distance/Time Speedmeter Handbook (Second Edition), Publication No 02/06	CL01 - Temperatures CL02 - Humidity EMC.I.07 - Immunity to conducted disturbances, induced by radio-frequency fields EMC.I.21 - Electrostatic discharge immunity (ESD) EMC.I.22 - Electrical fast transient / burst immunity (EFT) EMC.I.26 - Voltage dips, short interruptions and voltage variations Immunity EMC.I.40 - Radiated Immunity, ET01 - AC and DC voltage and frequency variations ME01 - Random vibration ME03 - Mechanical shock / Resistance to mishandling / Mechanical impact PT30 - Reference speed test in laboratory conditions PT31 - Reference speed test in practical conditions PT33 - Frequency and power output and beam width test
f	Speed meters	Belgian "Koninklijk besluit van 12 oktober 2010 betreffende de goedkeuring, ijking en de installatie van de meettoestellen gebruikt om toezicht te houden op de naleving van de wet betreffende de politie over het wegverkeer en haar uitvoeringsbesluiten van 12 oktober 2010"	CL01 - Temperatures CL02 - Humidity CL05 - Water EMC.I.07 - Immunity to conducted disturbances, induced by radio-frequency fields EMC.I.21 - Electrostatic discharge immunity (ESD) EMC.I.22 - Electrical fast transient / burst immunity (EFT) EMC.I.26 - Voltage dips, short interruptions and voltage variations Immunity EMC.I.40 - Radiated Immunity, ET01 - AC and DC voltage and frequency variations ET02 - Current variation ME01 - Random vibration ME03 - Mechanical shock / Resistance to mishandling / Mechanical impact ME07 - Rotation PT11 - Clock accuracy PT30 - Reference speed test in laboratory conditions PT31 - Reference speed test in practical conditions PT32 - Radar antenna diagram PT33 - Frequency and power output and beam width test
g	Breath alcohol test devices other than single use devices - Requirements and test methods	EN 15964:2011	CL01 - Temperatures CL02 - Humidity EMC.I.21 - Electrostatic discharge immunity (ESD) EMC.I.40 - Radiated Immunity, ET01 - AC and DC voltage and frequency variations ME01 - Random vibration ME02 - Sinusoidal vibration ME03 - Mechanical shock / Resistance to mishandling / Mechanical impact PT02 - Pressure tests PT10 - Reference gas testing (Type 2 generator including the possibility for simplified gas)

1) The requirements are supplemented, where appropriate, by specific instrument requirements in the directives (MI-001 until MI-010), OIML Document D 11 and WELMEC guidance and test documents.
